NOVA NEWS

December, 1979 - January, 1980

HAPPY 15TH ANNIVERSARY, NOVA UNIVERSITY!

On December 4, 1964, Nova University of Advanced Technology, Inc., was chartered by the state of Florida, and soon opened an office on East Las Olas Boulevard, in a building which now houses the Fort Lauderdale Museum of the Arts.

Fifteen years is an extremely brief period of time in the life of an institution of higher education — which makes Nova's record of

achievements over the years all the more impressive. Fully accredited by the Southern Association of Colleges and Schools, Nova has been a leader for change and experiment in education, and earned an international reputation as a pioneer in the development of programs suited to the rapidly changing world in which we live.

As Dr. Abraham Fischler notes in the

President's Report on the 15th Anniversary of Nova University, "The best history is a record of the lives of people who have made a difference because they have given their vision and energy, their creativity, and their commitment to others. It is no less so with the history of any great university..."

"In the end, we judge a university less by what it has amassed for itself than by how

much it has given, tangibly and intangibly, to its students and to others. In its brief but dramatic history, Nova University has, above all, followed a single precept — that education must serve the needs of the individual and that by doing so, it will serve the needs of society."

More on Nova's Anniversary on pages 3 and 4.

BULLETIN BOARD

Winter Term Opens

The Winter term at Nova College's Center for Undergraduate Studies begins Jan. 5. A schedule of class offerings and registration forms are available at the registrar's office, Room 103, Parker Building.

Students may register now for eight of 16 week courses, either by mail or in person. Registration received by Dec. 21 is eligible for a \$5 reduction in registration fees.

Final registration on the main campus is from 5 to 8:30 p.m., Dec. 26 and 27, and Jan. 2. Final registration at Coral Springs is from 5-8:30 p.m. Jan. 2 and 3.

For further information, call 475-8300 ext. 395. Program counseling is available through ext. 295.

By The Sea, By The Beautiful Sea

It's down to the seashore with notepads (again) for a group of latter-day explorers seeking to learn more about the fascinating world of a coastal zone ecosystem.

They're taking a unique five-day intensive study course called "Oceanology in the Curriculum" designed to acquaint teachers with the diversity of life forms which inhabit the air-sea-land interface of beaches and swamps, and give them the tools they need to teach this intriguing subject in their own classrooms.

The course, offered by National Teacher Education Programs, will be given Dec. 26 to Dec. 30.

For further information, call Dr. Robert Burke at 475-8300 ext. 340.

Learning How To Parent

As every parent knows, there's a lot more to parenting than just having a baby. Grandmothers are great, but sometimes parents need the advice — and reassurance — of a professional.

Nova's Parent Education Center is now in the midst of its second cycle of courses designed to help parents during those first few, frequently bewildering years. The courses include "Preparing For Parenthood," "Infant Awareness," "Parent Cooperative Toddler Program," and "Effective Parenting: Living With Pre-Schoolers and Enjoying It."

For further information, call Director Dr. Wendy Masi at 475-1666.

Conference On Aging

The second annual Nova Behavioral Conference on Aging will be held January 23-26 at the Galt Ocean Mile Hotel, Fort Lauderdale. Nationally recognized psychologists, researchers and gerontologists will deliver presentations relevant to the conference's theme, "Enhancing the Quality of Life in the Later Years." Among the activities planned are a funding luncheon, a banquet, films and a variety of social activities.

A new addition to this year's conference will be the community exhibit area where local and state programs affecting the lives of the elderly will set up displays and explain their programs. This portion of the conference is free of charge, and the general public is invited to attend.

For registration information, call Dennis Dannacher at 475-8300, ext. 306.

New Program Planned

A new program offering an Education Specialist degree in Exceptional Child Education, is now in the planning stages. The program, which will follow the nine-week format of the masters program, is planned for Lake Worth and the main campus.

Those interested in the program may call Dr. Anna Burke at 475-8300 ext. 340.

Try Communicating ...

When dinner is boiling over on the stove, the telephone is ringing and so is the doorbell, and your pre-schooler is practicing karate on the baby's head ... is intra-family communication possible?

Indeed it is, providing you can manage to maintain your sense of self-awareness (along with your cool), engage your family in stimulating, productive conversation, and work to develop a feeling of mutual self-respect, contends Deena Golding.

Ms. Golding, an authority on parenting, will explain how all this can be done, at a free workshop Jan. 16, sponsored by Nova University at Coral Springs and the Coral Springs Women's Club. The workshops will be held in the auditorium of the Bank of Coral Springs Plaza at 8 p.m.

For further information, call Marion Bell at 753-3300.

Conspicuous Consumption Can Be Stopped

Tired of fighting the eternal "battle of the bulge"? And losing?

Nova's Psychological Clinic may be able to give you the ammunition you need to fight the good fight against over-weight — and to win.

People interested in participating in a research and treatment project involving the use of behavior modification techniques to control eating disorders of all kinds are invited to call Dr. Martin Lerner at 475-8300 ext. 291. Groups begin in January.

Second Annual Labor Law Seminar

Nova University Law Center and the American Arbitration Association will co-sponsor the Second Annual Labor Law Seminar, March, 1980, Hotel Pier 66, Fort Lauderdale, Florida.

The program coordinators are Tracy H. Ferguson, senior member of Bond Schoeneck & King, Syracuse, New York, and the Director of Continuing Legal Education for Nova Law Center.

Registrants will receive an inside view from individuals concerned with the areas of labor laws: arbitration, discrimination, governmental regulations and legislation trends. A distinguished faculty of professionals representing labor, employees, management and government will present papers at the two-day event.

Registration fee is \$195. A refundable advance registration fee of \$50 is suggested to insure peak season hotel accommodations for the March 3 and 4 event. Additional information and registration contact Roland C. Graff, Nova University Law Center, 3100 S.W. 9th Avenue, Fort Lauderdale, Florida 33315. The phone is 522-2300.

Getting Involved

Ever consider getting involved — really involved — in local government? Perhaps running for city commissioner?

The spirit may be willing, but there's lots the flesh needs to know about the nuts and bolts aspects of running for public office — things like how to file for candidacy, electioneering and campaigning techniques, defining the issues affecting the voter, ethical conduct for candidates, campaign financing and financial disclosure.

All these and more will be covered in detail at a one-day seminar sponsored by Nova University's Government Assistance Service in cooperation with the Broward League of Cities. The seminar, to be held Thursday, Dec. 20, beginning at 9 a.m., will feature speakers like Jane Carroll, County Supervisor of Elections; Betty Derington, City Clerk of Hollywood; Dorothy Glisson, Director of the State Division of Elections; Joel Gustafson, member of the State Ethics Commission; Lois Delevoe, of the Women's Political Caucus; and Constance Hoffman, Deputy City Manager of Fort Lauderdale.

The \$10 fee covers the seminar, materials and lunch. Deadline for applications is Dec. 17. For further information, call Lila Hyman at 475-8300 ext. 364.

Hypnosis Workshop Set

Nova's Psychology Department, in cooperation with the Broward County Psychological Association, is presenting a two-day workshop titled "Introduction To Clinical Applications of Hypnosis", February 15 and 16, from 9 a.m. to 5:30 p.m., at the Mailman Building, Room 223.

The workshop will be led by Melvin A. Grawitz, Ph.D., president of the American Society of Clinical Hypnosis and Diplomate of ABPP and ABPH.

The lecture presentations will be augmented by video and audio tapes, and there will be ample opportunities for participants to engage in question and answer sessions.

Cost of the two-day workshop is \$80. For information and reservations, call Dennis Dannacher at 475-8300 ext. 306, or write him at Nova University Behavioral Sciences Center, College Ave., Fort Lauderdale, FL 33314. The workshop is limited to 30 participants, and registration must be received by Jan. 10, 1980.

Easing The Pain

You can't live with it, but you can't live without it.

That's the way a lot of people feel about Math and Science. They realize full well that in this modern, technologically-oriented society, knowledge of Math and Science is vitally important. But they're still trailing gloomy clouds of worry and suspicion left over from dismal experiences with Math and Science in grade or high school.

Cheer up! Nova College has developed a series of Math and Science courses for non-major that take the worry out of being close. Everything covered is aimed at solving real-life problems; exams are all open-book; and handheld calculators are welcome.

For further information, call the College at ext. 295.

Artists Wanted

Sunday painters, sculptors and photographers are invited to participate in the "Arts of Spring," a Nova-only art show to be held on-campus early in the Spring. Faculty, staff, students, alumni, members of the Nova family and THEIR families, are welcome to exhibit their works in this non-juried, just-for-the-fun-of-it show. To reserve your space, call Bette Leverentz at ext. 311,2.

Brains And Beauty

Applications for "Miss Broward County," the first step toward the "Miss America" title, are now being accepted from "single women, ages 17 to 26."

"Miss Broward County is not a beauty contest but a scholarship pageant," explains producer Edd Weiner. "The winners are given scholarship awards to aid them in obtaining an education at the colleges of their choice."

The "Miss Broward County Pageant" will be held March 15, 1980 at BCC's Bailey Concert Hall. Deadline for applications is Dec. 15. For information call 472-6328.

PRESIDENT'S MESSAGE

On December 4th, the University celebrated its 15th anniversary. People gathered at the Diplomat Hotel to honor Mr. James Farquhar, founding Chairman of the Board of Trustees and an individual who has dedicated himself to help build a University in Broward County which would be compatible with the spirit of the educational park envisioned by the founders of the South Florida Education Center in 1960. The founders of that Center believed that the park should be innovative and experimental and at the avant garde of American education from pre-school through post-doctoral.

Nova University has accepted its charge. During the past 15 years, it has pioneered in the creation of research centers as well as national programs, which have had significant impact not only on higher education itself, but also on those institutions in which our students and graduates are employed.

The challenge of the '80s is before us — to maintain this spirit of innovation within the context of providing quality education utilizing more of the technology available and constantly assessing our educational programs in relation to our stated goals. This challenge requires the creativity and dedication of all those directly associated with the University and those who support its mission.

As we begin the new decade, the University has achieved economic viability and has survived the constraining pressures of the establishment. The task ahead is even more exciting than that of the past 15 years: to build a full-time Nova College; to begin additional professional schools; to improve upon our national programs; to respond to the needs of local industrial groups and retirees. These are just a few of the opportunities before us. To be successful, we need the commitment and the support of every reader of this publication.

My wife and I wish each of you and your families a very happy and healthy New Year. May your every wish come true!

Patent Granted

Dr. Alexander Schure, Chancellor of Nova and President of New York Institute of Technology, and Dr. William Glenn, Director of the NYIT Science and Research Lab at Nova's Ocean Sciences Center in Dania, have been granted a U.S. patent for their invention of a stack of fibre optical image magnification units which can be used to generate three-dimensional images.

The NYIT Science and Research Center, established four years ago, is involved in projects related to the development of technology for real time ultrasonic imaging, charge couple device displays, and holography. Dr. Glenn, a graduate of Georgia Institute of Technology and the University of California at Berkeley, is a Fellow of the Society of Motion Pictures and Television Engineers. He has received two Industrial Research Awards for engineering achievement, and an "Emmy" for his role in the development of an electronic device which reduces "noise" in television pictures. He holds numerous U.S. patents, and is a highly published authority on a broad range of electronic specialties.

Dr. Schure also holds a number of patents. He is the author of more than 50 technical publications in the electronics field, and director of numerous research projects relating to the application of technological devices to education. Among these are the development and validation of pilot programs in math and science supported by the U.S. Office of Education, a program on college physics for the U.S. Naval Academy, and grants from the Carnegie and Ford Foundations. Dr. Schure developed new computerized techniques in film animation, and a process for electronic painting. He is an experienced TV producer, responsible for the production of more than a dozen animated films, one of which was a winner of the International Film Festival Award.

Nova News is a publication of, by, and for the Nova community and its many friends. If you've done something especially noteworthy lately — gotten a promotion, published a paper or a book, completed an important project, received an honor or award — please notify the News so that everyone can share your proud accomplishment.

Please notify the News also if you change your address, remembering to include the Center or Program you are or have been associated with.

Nova News is published 10 times a year (double issues, Dec.-Jan. and July-Aug.) Circulation is 23,000.

Community-Based Education: It's Working

Community-based education is a concept which virtually everyone supports. Making it happen, though, takes a lot of hard work, planning, evaluation, re-evaluation, and most of all, a strong sense of commitment — undertakings which Dr. Pat Distasio, Director of Nova at Coral Springs, his staff, and the entire community have taken on with a fervor which could be called visionary, if it were not also so solidly pragmatic.

"We're learning as much from our mistakes as from our successes," says Distasio. "In the 'Connections' series, which we ran in cooperation with the Broward County Library, for example, we found that we had spread ourselves too thinly. We used too many different libraries and held too many different forums, not all of which were planned as carefully as they could have been."

What did emerge from the series, though, was the realization that a multi-media approach to teaching — using TV and newspapers in addition to conventional classroom instruction, and holding public forums so that everyone could participate in the learning process whether they were signed up for degree credits or not — was so successful, so popular, an educational methodology, that it bears repeating. In improved form, of course.

The next multi-media course should represent a considerable improvement. Titled "Energy and The Way We Live," the course will offer public forums in only three libraries (in the north, central and southern parts of the county). Its content will also be more carefully planned and supervised by Nova's own experts in the field. The course, which will include programs on public radio in addition to TV and newspapers, begins on Feb. 5. It can be taken for credit through Nova at Coral Springs.

Other "alternative classroom" courses of-

ferred at Coral Springs during the next trimester include "The Film Industry," "Advanced Film Seminar," "Introduction to Electronic Data Processing," and "Childhood and Family Dynamics."

Another component of community-based education is the series, instituted last trimester, which used the community itself as a laboratory for the examination of social, economic and cultural trends, the identification of problem areas, and the development of workable solutions. The course titled "Urban Politics and Problems" offered in cooperation with Coral Ridge/Wetmore and the city of Coral Springs, in which two students worked out a car-pooling plan, received particular praise from city officials. A second course, "Practicum in Contemporary Humanities" also worked well in identifying the strengths and weaknesses in the city's cultural organizations, and helped the Cultural Society in its future planning. A third, called "Retailing Management," which was offered in conjunction with the Chamber of Commerce, was also judged highly successful, Distasio reports.

"But these were only the first group of courses — they were experiments," he adds. "We're now collecting and evaluating the results, so that we can make the next series even better."

"By next Fall, every course at Coral Springs will have a community-based component. And they'll work," Distasio predicted. "Because we're involving everyone in the process. The students are involved in the feedback; the instructors are involved in the planning; the community's organizations are involved in the definition of needs; and Nova's faculty and staff are involved in lending their expertise. When you've got that much talent working together to make something happen, it can't help but be successful."

Half A Decade And Counting

A group — a large group — of people who have been with Nova University for five years or more, were honored at a staff luncheon at the University School Nov. 27.

Among the honorees were: Megaly Arias, Tom Baynes, Chris Bennett, Joel Berman, Anna Mae Burke, Ken Dose, Ana Maria Eccles, Phyllis Fabara, Betty Gill, George Graham, Clayton Herrick, Susan Hyatt.

Also honored at the luncheon were those who have been with Nova longer than five years. Among them were (left to right): Helen Graham, Ross Moreton, Debbi Robin, Carol Knox, Toni Steinberg, Bette

Laurance Hyde, Suzanne Kelley, Ruth Lazarus, Johanne Ibsen Noble, Connie Pine, Ethel Raddon, Bruce Rogow, Rose Anne Schaefer, Bill Spade, Bill Vogel, Lois McCoy, Louis Taylor, Henrietta Tierney, Charles Pierre Lellouche, Barry Centini, Bob Sherman, Jim Schraeder, Anne Mulcahy, Carla Monti, and Dede Allen.

Leverentz, Elaine Livingston, George Kirschner, Bob Bogorff, Mary Templin, Murray Heyert, Sam Freed, Sam Kaylin, Robert Gill and Robert Burke.

"Career Nights" Successful

Nova College participated in a series of "College Career Nights" at several area high schools and junior colleges, at which institutions like Dartmouth, the University of Chicago, Notre Dame and Wellesley were also represented.

Hundreds of inquiries about Nova's undergraduate and graduate programs have been received as a result of the "Career Nights," Nova College reports. "We were also fortunate in having an opportunity to meet with representatives of universities and colleges throughout the United States, to introduce ourselves and to learn more about what other institutions of higher education are doing to serve student interests and needs," said Gary Feinberg, one of Nova's representatives at the "Career Nights."

Achieving Competence

Dr. George Lawniczak attended a recent conference at Alverno College in Milwaukee, Ill., to learn more about that university's model "competency assessment" program — a method by which students are judged (graded) on the basis of their having achieved certain defined levels of competency in eight general areas. The areas are: effective communications ability, analytical ability, problem solving ability, facility in forming value judgements within the decision-making process, effective social interaction, understanding of individual/environment relationships, understanding of the contemporary world, and educated responsiveness to the arts and humanities. Dr. Lawniczak was extremely impressed with Alverno's program, and is now exploring ways for Nova to use this model in one or more of its own program areas.

STUDENT OF THE MONTH

In less than one year, David Carlivati, a participant in Nova's D.B.A. program, turned the \$30 million boondoggle that was Palm Beach County's CETA program into a going proposition — an accomplishment that's been greeted as much with wonder as with admiration by everyone who's ever thought that CETA programs, almost by definition, are hopeless to administer.

How did he do it?

"My courses at Nova gave me an opportunity to look on my job from a whole different perspective — to learn how to apply new theories of management and sound business practices in a practical setting," he explains. "I had a lot of experience in the public sectors before — I had to clean up a \$3.3 billion welfare mess in New York under Mayor Lindsey — but being in a D.B.A. program helped me look at new ways to use private sector principals in a public sector setting. And that turned out to be the key to the whole thing."

Carlivati's accomplishments have won the highest praise, and assurances of continued funding, from federal officials who only last year had threatened to cut off all funding from the program. In less than a year, Carlivati managed to increase the rate of people employed under the program by 50 percent, double the number of people placed in unsubsidized jobs, and reduce the number of firings by 42 percent.

To Carlivati, of course, it's all in a day's work. And the pride he feels has less to do with personal celebrity than with the professional satisfaction of knowing that his program, in whole and in part, will now serve as a model which will help ensure the success of CETA programs throughout the nation.

"I think the greatest challenge of the '80s will be the linking of the public and the private sectors," Carlivati says.

Who's Who? Us!

The 1979-80 edition of "Who's Who Among Students In American Universities and Colleges" will carry the names of 29 students from Nova who have been selected as being among the country's most outstanding campus leaders. The nominations were based on the students' academic achievement, service to the community, leadership, and future potential.

The students are: Dennis Alarie, Betsy Cameron, Mary Duggan, Chris Edwards, John George, Ken Hoffman, Russ Killinger, Paul Langerman, Patricia Mavin, Joan McDermott, Greg Ross, Chuck Wilder, (all from the Law Center); Susan C. Cobb, Carl R. Cooper, Robert G. Hunter, William H. Kohn, Lewis L. Lash, John W. McCall, Sanford L. Morton, Margaret R. Shearon, and Sandra Sparber (all of GMP); David Ahern and Gary Duke (BSC); Shirley Fagan, William Kessler, Dorothy Ross, Joan Voyles, Virgil Voyles, and Gertrude Helin (CJ).

These students join an elite group of students selected from more than 1,200 institutions of higher learning in all 50 states, the District of Columbia, and several foreign countries.

Public Goes Private

Two Public Service professionals engaged in a very private service in Oct., to the proud delight of several of their colleagues who firmly contend that it was Nova that made it all happen.

Marjorie Vallone, a former MAPS Cluster Developer and now a staffer with Nova's West Palm Beach CETA Project, and Richard Moreley, a MAPS Cluster Director, were married at the St. John Fisher R.C. Church in West Palm Beach.

Among the guests were Peter and Marian Korn, Lila and Harold Myman (representing the Business Affairs office); Phyllis Brick, Pat Barker, Christine Noon, Nancy Varner, Rosylin Shapiro, Beverly Fisher, June Wachtel and Pauline Zempel (of CPAA) and Stewart McCord, Director of the CETA Project.

Making The Connection

"Connections: Technology — Friends or Foe" was a multi-media course involving the use of newspapers, TV programs, and lecture/discussion sessions at various Broward County libraries. Nova at Coral Springs is offering the course for credit.

Several Nova people actively participated in the course, as lecturers or as group discussion leaders. Among the Nova people involved were: Pat Distasio, Kevin Keating, Ed Martino, Joel Warren, and Shirley Green.

Nova Celebrates 15th Anniversary With Dinner-Dance

Donna and Ray Qualmann

More than 300 people gathered at the Diplomat Hotel December 4, the night of Nova's 15th anniversary, to celebrate the occasion with a dinner/dance, and to pay tribute to James Farquhar, "Mr. Nova," who has done so much over the years on behalf of the university.

The guests represented the Board of Trustees (past, present, and honorary), the President's Club, the Davie Founders, the Hollywood Founders, Gold Circle, Gold Key, the Executive Council, community leaders in business, industry and education, faculty, staff, and friends and supporters of the university through the years.

Mary McCahill, chairman of the Board of Trustees, presented Mr. Farquhar with an engraved crystal prism, and Dr. Alexander Schure, Chancellor of Nova, paid him special tribute. William and Pat Holland, who saw to the arrangements for the party, were presented with a crystal ashtray. Special thanks were also given to Bobbe Schlesinger and Toni Paoli who arranged for the beautiful decorations.

Dr. Abraham Fischler, president of Nova, read congratulatory letters from Governor Robert Graham, former governor Reubin Askew, Senator Richard Stone, and several high ranking state officials.

And a fine and festive time was had by all.

photos by John Meaders

President's Report Is Ready

Did you know that . . .

- Since its inception, Nova has spent more than \$90 million on goods, services, salaries and construction of its main campus facility and Ocean Sciences Center — most of it in the tri-county area?

- Nova is one of Broward County's largest employers? It's faculty and staff number close to 520; its annual payroll is nearly \$7.8 million.

- Nova is the second largest independent university in the state of Florida, and one of only five universities in the state to have a law school?

- Nova has nearly 7,000 graduates who live in 36 states, Puerto Rico, the District Colum-

bia and eight foreign countries?

- Since 1969, Nova has received 255 grants totaling \$15 million for research in the life sciences, ocean sciences, education, the behavioral sciences and the problems of cities?

- Through its Film Society, art shows and musical programs, Nova has enriched the lives of 43,570 people of all ages?

These are only a few of the exciting revelations contained in the President's Report On The 15th Anniversary of Nova University. Copies of the Report are now being distributed to the entire Nova community and its many friends. If you haven't received yours within the next few weeks, call the president's office at ext. 255.

Getting To Know You . . .

There are lots of new faces around the campus this year — and lots of puzzled people, veterans and newcomers alike, who still haven't quite sorted out who's in charge of what.

And so, in an effort to bring a bit of order to the present state of friendly, bemused chaos everyone is experiencing, here's the current line-up:

Center Directors

John Flynn — Behavioral Sciences
Gerald Sroufe — School-Leadership Development (National Ed.D. Program for Ed Leaders)
Ross Moreton — Center for Higher Education
John Clarke — Center for Public Affairs and Administration
Ovid Lewis — Center for the Study of Law
Philip DeTurk — Center for Undergraduate Studies (Nova College)
Joseph Randazzo — School Center (University School)
Patrick Distasio — Nova University at Coral Springs
Joel Warren — Life Sciences Center

Program Directors

Ethel Raddon — Learning Technology
Edward Simco — Computer Systems Management
Doil Montgomery — Biofeedback Lab
Joe Davis — Child Assessment Clinic
Anne Goff — Psychological Clinic (Coral Springs)
Michael Palmer — Masters Program in Counseling and Guidance
Richard Goldman — Masters of Science Program for Child Care Administrators;

Ed.D. Program in Early Childhood Education
George Lawniczak — Science and Technology Curriculum
Marilyn Segal — Institute of Child Centered Education
Wayne Williams — Institute for Survival Technology
Wendy Masi — Parents Awareness Institute
Eugene DuBois — Institute for Staff Development
Edgar Cate — Master of Science in Institutional Development
Phyllis Brick — Masters in Management and Public Service
Roland Graff — Continuing Legal Education
David Britt — Graduate Criminal Justice Programs
Debbi Robin — Lifelong Learning Institute, Institute for Retired Professionals
Robert Burke — National Teacher Education Programs
Martin Veiner — Graduate Management Programs
David Barone — Human Sciences (Nova College); Masters in Psychology (BSC)
Gerald Strei — Intensive English Program
William Glenn — Science and Technology Research Center, NYIT
Anna Burke — Chm., Department of Education and Social Services (BSC)
Toni Steinberg — National Alumni Association
Gary Feinberg — Criminal Justice Programs (Nova College)
John Cicero — Business Administration (Nova College)
Louis Huch — Development
Rose Ann Schaefer — Special Events
Stephen Goldstein — Public Relations, External Affairs, Alumni Affairs, Marketing.
Ray Sanchez — Publications
Shirley Green — News

A New Face On Camera

by Lynn Peglar

The Learning Technology Lab's photographer, John Meaders, has a new apprentice through the University School's 'Off-Campus Exploration Program.' Edward Ablon is a senior this year at the University School, and is interested in photography. He spends two hours a day, four days a week, in the Lab absorbing Learning Technology's inner workings.

This program, engineered by Marlene Turk for the 11th and 12th year students at the University School, enables students with special interests to actively participate and receive on-site experience while earning academic credits. For nine weeks students can see what it's like to work at what they are interested in. These interests can be quite varied. As Edward says, "Some students work with veterinarians, medical doctors, lawyers, some in different stores, and one person is working in a Botanical Research Garden. On the fifth day, we all come together and have a group discussion on what we've learned."

The success of this program seems apparent from Edward's enthusiasm. "This year," Edward explains, "the program is slightly different and more effective. Not only do you work off-campus, but you get experience with things like writing applications for jobs, resumes, also different types of insurance and how to prepare your taxes. I would say, at least a third of the senior class is involved in it!"

As Edward is finding out, there is more to photography than film, cameras, and the dark room. "I've learned quite a bit about videotaping as well as making a commercial, which I did!" Exclaimed Edward, "It was amazing that for a minute and a half commercial it took us at least 45 minutes to tape it and get it fairly perfect."

Reaching Out

The Learning Technology Laboratory is initiating a service that will meet an important need in Broward County — a need to inform residents of the social services that are available to them.

LTL has developed a new program called Media Outreach Project, designed to help Broward's social service agencies get their message across to the public. This project, the first of its kind ever to be attempted in the county began with the training of two BETA (Broward Educational Training Assistance) people, Lynn Peglar and Ron Covit, in public relations and public informational techniques. They have been attending classes on the preparation of flyers, the print media, newsletters, brochures, TV and radio spots — all taught by Eunice Sluyter, M.A. and members of the LTL staff.

Now that the class work is over, Ms. Peglar and Covit are going out into the community, visiting various social service agencies to discuss with them ways to effectively inform the public of the services they offer. They will then assist these agencies in developing plans and relevant materials to reach their communications goal. There is no fee for their services. Funding is through a \$10,000 grant awarded to LTL for the project.

For further information, call Ethel Raddon at ext. 311,2.

The State Of Caring

Nova's Foster Parent Project has just been awarded a \$94,000 grant from HRS (the state department of Health and Rehabilitative Services) to implement a foster care education program in seven HRS districts covering the areas of Tallahassee, Gainesville, St. Petersburg-Clearwater, Tampa, Fort Myers, Palm Beach and Miami.

The Foster Parent Project is already carrying on its unique program, which involves the training of potential as opposed to existing foster parents, in two other districts, covering Broward County and Pensacola. And on Jan. 1, the Project will receive funding for a foster care education program in Orlando, making Nova the agency that is providing foster care education in 10 out of 11 HRS districts.

With the grant, Nova will train the staff members of social service agencies to train potential foster parents in their own areas — a program which should go far toward improving the level of foster care throughout the state, said Project Director Audrey Fields.

Ralph Nader (left) and Dr. Abraham Fischler engage in an animated discussion of consumer problems relating to the educational sphere, at the National

Ed.D. Program for Educational Leaders' Summer Workshop held in Washington, D.C.

ALUMNI NEWS

Alumni Celebrate Nova University's 15th Anniversary

Alumni from all Nova University's programs in the South Florida area celebrated Nova's 15th Anniversary at the Players Club in Fort Lauderdale, on Saturday, October 27, 1979.

Laughing, chattering groups gathered together outside at tables around the attractive pool area, or inside near the dance floor, where alumni renewed acquaintance with faculty, staff and each other.

Graduates from the CPAA were delighted to meet Dr. John Clarke, the new director of the program. Two of the DPA graduates were from other states; one from Washington, D.C., and one from Ala.

Prior to the midnight breakfast, Douglas Yoder, Region I Coordinator, welcomed the graduates and, with the help of Natalie Hickey, presented five lucky door prize winners with Nova "15" T-Shirts. He then presented Dr. Abraham Fischler who spoke of the impact Nova graduates were making nationwide, the settlement of the Unitrust, and some of Nova's plans for the future.

Consensus of opinion was that the evening was a success and that similar events should be planned.

Having a wonderful time at the Alumni party were (left to right) Barbara DeTurk, Phil DeTurk, Dennis

Dannacher (seated), Drs. Wendy and Nick Masi and Bonnie Flynn.

Activities On The National Level

A successful dinner meeting was held during the Summer Institute of Nova's Center for Higher Education on July 30, 1979, at the Town and Country Hotel in San Diego, Cal. Dr. Abraham Fischler, who was accompanied by Mrs. Fischler, was the guest speaker. Dr. Fred Nelson and members of the C.H.E. central staff also attended.

The first alumni meeting to be held in Houston, Tex., took place during the 62nd annual meeting of the American Council on Education at the Sheraton-Houston Hotel on October 30, 1979. Dr. Fischler and Dr. Stephen Goldstein attended.

A dinner meeting was held at the Hyatt-Regency Hotel in Atlanta on December 8, 1979. This meeting was held during the 84th annual meeting of the Southern Association of Colleges and Schools. Alumni of all programs in the area were invited. Dr. Fischler was the guest speaker and Dr. Goldstein also attended.

Ronald L. Liebman, DPA, represented the University at the inauguration of Norman Lawrence Stewart as president of Rockford College, Rockford, Illinois on Oct. 26, 1979.

Graduates Making News

REGION I

Kathie Sigler

Kathie Sigler, Ed.D. (C.H.E. '77), has been appointed as Associate Dean for the Urban Affairs and Occupational Careers Division at Miami-Dade Community College, New World Center Campus. This new division will include all occupational departments as well as all grant programs. Dr. Sigler was formerly Project Director of the Skills Training Improvement Program, a grant serving 700 disadvantaged Dade County students.

Dorothy B. Fernstrom, Ed.D. (C.H.E. '76), an instructor and counselor at Okaloosa-Walton Junior College, Niceville, Fla. has developed a new college credit course entitled "Adults in a changing world". Dr. Fernstrom's innovative courses are receiving much attention and publicity in her home area.

Gloria Vacca Mahoney, Ed.D. (C.H.E. '79), has developed a lecture/workshop which she has presented nine times, with five additional presentations scheduled for the immediate future. Dr. Mahoney states that her Nova practicum experience was instrumental in the development of the lecture/workshop.

Chester Handleman, Ed.D. (C.H.E. '75), of the Department of History and Political Sciences at Broward Community College was a member of a panel of speakers at the Southern Political Science Association's annual convention at Gatlinburg, Tenn. on November 1, 1979. The panel topic was: "Teaching Political Science: Introducing the Discipline to Undergraduates."

Dr. Handleman will also deliver a paper at the National Convention of the Community College Social Science Association in Louisville, Kentucky, also in November. The title of the paper is "The Public Media Versus The Professional Books and Journals."

An article by Dr. Handleman on academic standards and evaluation will appear in the Fall (1979) issue of the professional journal "Education." Recently he was elected vice-chairperson of the Faculty Senate at Broward Community College.

H. Terry Brower, Ed.D. (C.H.E. '79), director, Geriatric Nurse Practitioner Program in the University of Miami School of Nursing, has been named a fellow of the American Academy of Nursing. Dr. Brower is one of 59 new fellows admitted to the academy, composed of registered nurses who have made

significant contributions to the nursing profession.

Dr. Brower has written numerous articles on nursing practice, nursing education, and the care of the elderly which have been published in nursing and gerontological periodicals. She also collaborated with three other authors on a textbook, "Primary Health Care of the Older Adult," published in November 1979. She was also named to the editorial board of the "Journal of Gerontological Nursing."

Roger B. Pelser, MS (NTEP '78) has been promoted Assistant Principal for Community Education at Lake Worth High Community School, Lake Worth, Florida.

Vilma E. Zalupski, Ed.D. (C.H.E. '75), has become the first female to be appointed PROVOST in the State of Florida. Dr. Zalupski's new position is Provost, St. Petersburg Jr. College, Clearwater Campus.

David L. Goetsch, Ed.D. (C.H.E. '79), writes that concurrent with his doctoral studies, he has authored the following:

- Textbooks: "Finding, Getting, and Keeping a Job in Drafting". This work was displayed at the annual conference of the Florida Association of Community Colleges.
- Articles: "An Administrators Viewpoint: Two Current Challenges to Educators." Journal of Studies in Technical Careers, Vol. 1, Number 4, Fall, 1979
- "Finding, Getting and Keeping a Job," Florida Vocational Journal, Feb., 1979.
- "Calculated Neglect in the Vocational Classroom," Georgia Journal of Trade and Industrial Education, Dec., 1978.
- "Metric Education for the Adult Learner: How to do it," Lifelong Learning: The Adult Years, Nov., 1978.
- "Metre, Litre, Gram, Celcius," Community and Junior College Journal, Sept., 1978.
- "Metricorner — Metrics in Vocational Education," School Shop, April, 1978.
- "Teaching Students to Think Metric," Florida Vocational Journal, April, 1978.
- "Drafting Women Into Traditionally Male Programs," Florida Vocational Journal, April, 1978.
- Workshops: 1) "Improving Placement in Vocational Programs." Presented to 200 industrial educators at the annual conference of the Florida Vocational Association in Orlando, Fla., July, 1979. 2) "Metrics for Nurses." Presented to 150 Northwest Florida nurses at the Baptist Hospital in Pensacola, Fla., June, 1979. 3) "Metrication in America." Presented to the Okaloosa Chapter of the American Business Women's Association in Niceville, Fla., April, 1979.

Morton F. Meltzer, DPA (CPAA '77) was selected as the official observer for Information Industry Association at the White House Conference on Library and Information Services, Nov. 15-19, in Washington, D.C. Dr. Meltzer is the information manager at Martin Marietta Corporation in Orlando, Fla. He is also on the advisory board of the Associated Information Managers, a program of the Information Industry Association.

Anthony H. "Tony" Ortenzi, DPA (CPAA '78) was inducted into Western Maryland College Sports Hall of Fame on Oct. 12, 1979. Dr. Ortenzi also played pro-football with the

Washington Senators. He has an outstanding U.S. Army career, retiring in 1970 with the rank of Colonel. Dr. Ortenzi is now living in Maitland, Fla., where he is deeply involved in such civic activities as the development of a financial plan for Orange County's football stadium (making possible the Tangerine Bowl) and legislative programs for senior citizens. He is an adjunct professor at Seminole Community College.

John C. Thurber, Ed.D. (CSLD '75) Director, Professional Staff Development and Teacher Education Center in Palm Beach County, Fla., was re-elected to a three year term on the Board of Trustees of the National Staff Development Council, during the Council's annual meeting Oct. 23-26, 1979. At the same time, Dr. Thurber was appointed as the international program liaison for the organization. The term will run through 1982.

Kenneth W. Hise, Ed.D. (C.H.E. '76). The Florida Association of Community Colleges held its annual convention at the Eden Roc Hotel, Miami Beach, from October 31 through Nov. 3, 1979. During the closing session Dr. Hise took the oath of office to serve as president for 1980. The association is comprised of approximately 4,000 persons either employed by or closely associated with Florida's 28 community colleges. FACC is recognized as a leader in providing an avenue for the professional development of all of Florida's community college people. It also serves as a watch-dog for the community colleges and assures that their interests are preserved during Florida's legislative sessions.

Robert C. Preziosi, DPA (CPAA '77), has become Consulting Associate of Organizational Renewal Inc., The Gordon Lippitt Consulting Group. Dr. Preziosi has worked with the Departments of HEW, Interior, Agriculture and State, and also with major corporations in the U.S., Canada and Japan.

Cody Leater Gear, Jr., BS (C.J. '79) was recently promoted to Chief of Police, Fernandina Beach Police Dept., Fernandina Beach, Fla.

Leroy Chris Anacletio, MS (C.J. '79), has been appointed to the Manatee County Criminal Justice Advisory Board. The Advisory Board was developed as a result of action by the Governor of the State of Florida, and by action of the Governor's Council on Criminal Justice Planning in Manatee County. On agreement with the Board of County Commissioners of Manatee County, TBRPC undertook to provide staff services under the direction of a policy board selected by the Board of County Commissioners. The Advisory Board shall be responsible for: Advising the Manatee County Board of Commissioners for: 1. development of program areas to be included in the Manatee County portion of the Region VIII Criminal Justice Comprehensive Criminal Justice Plan. 2. in the overall planning for the criminal justice system in Manatee County. 3. providing information on the county-wide plan for criminal justice. 4. reviewing and recommending allocations of subgrants for criminal justice activities. 5. providing a forum for the discussion and investigation of issues affecting Manatee County Criminal Justice System.

Deceased

We regret to report that Joseph S. Hosford, M.S. (C.J. '77), Chief of Police, Coconut Creek, Fla., died on Nov. 14, 1979.

REGION II

William B. Keene

William B. Keene, Ed.D. (C.S.L.D. '76), has been appointed Delaware state superintendent of schools, effective July 1, 1980. Dr. Keene, 46, has been deputy state superintendent since April, 1978, and earlier was superintendent of the Appoquinimink School District for nine years.

He has been president of three major educational groups in Delaware: the Del. State Education Assn. the Del. Assn. of School Administrators; and the Del. Assn. for Supervision and Curriculum Development. Dr. Keene was a member of the Delaware Tomorrow Commission and served on the boards of the Del. Council on Economic education and the Del. Community Education Assn.

As state superintendent he will be chief executive of the State Department of Public Instruction and executive secretary to the State Board of Education, which is responsible for the general administration and supervision of Delaware public schools.

Charles W. Blackwell, Jr. (C.P.A.A. '79), Assistant Manager of the General Accounting Dept. of the American Cast Iron Pipe Co., Birmingham, Ala., is the first employee of ACIPC to earn a doctorate degree. Dr. Blackwell became an assistant professor for Montevallo University in 1972 and has maintained his schedule continuously, instructing one or two subjects (sometimes more) each semester. He is a member of the National Association of Accountants.

Geneva B. Chavis, Ed.D. (C.H.E. '79), former Dean of Learning Resources at Nash Technical Institute has been promoted to Associate Vice President of Instructional and Resource Services at that institution, which is in Rocky Mount, N.C.

REGION III

Stanley Toll, Ed.D. (C.S.L.D. '76), has been appointed Superintendent of the North Salem Central School District in Westchester County, N.Y. Dr. Toll previously served as Principal of the Ossining High School, N.Y.

Richard W. Call, Ed.D. (C.H.E. '78), writes that he received a grant from Hoffman-LaRoche Inc. for \$44,000.00 to further analyze and develop programs to assist with student retention efforts at York College of Pennsylvania. Dr. Call particularly wishes us

(Continued on Page 5)

Graduates

to know that the grant was a direct result of research conducted while pursuing his doctorate at Nova.

Marvin Witte, Ed.D. (C.S.L.D. '75), a member of the Long Island Chapter, was elected president of the Nassau County (N.Y.) Elementary Principals Association for 1979/80.

Diane Gess, Ed.D. (C.S.L.D. '76), assistant principal at Hillcrest Elementary School, Spring Valley, N.Y., believes that commercial television can become an ally in the effort to get children back to reading books. Dr. Gess is convinced that films and television can both entertain and teach.

Because of her experience with children's television and her belief that "good entertainment can employ subtle messages which benefit society," she was recently asked to be one of a nine-member national panel to review proposal applications for a \$3 million government grant to improve the level of public educational TV programming.

Dr. Gess has served as a lecturer and educational consultant for many groups including the National Association for Supervision and Curriculum Development.

Edmund Haughey, Ed.D. (C.H.E. '77) was elected Second Vice President of the Harvard University Chapter, IOTA, of Phi Delta Kappa for 1979-80. Dr. Haughey is Coordinator of Academic Advisory and the Departmental Skills program of Bridgewater State College, Mass.

REGION IV

George Gunter, Ed.D. (C.S.L.D. '75), recently spoke to mayors of small cities at a meeting held in Scottsburg, Ind. His topic was "Better Communication Between Small Cities and the Federal Government". Dr. Gunter is Deputy Regional Director, Department of the Interior, Great Lakes Region, Chicago, Ill.

REGION V

Charles H. Broughton, Ed.D., Assistant Superintendent at Schertz-Cibola-University City Independent School District; **Galen R. Eloff, Ed.D.**, Assistant Superintendent at Judson Independent School District; and **Preston C. Stephens, Ed.D.**, Director of Student Resources at East Independent School District (all C.S.L.D. '76), are employed at the part-time facility of the University of Texas at San Antonio, teaching administrative courses. All

faculty members of the educational administration curriculum department have extensive employment backgrounds in the public schools.

Douglas W. Warner, Ed.D. (C.H.E. '75) was named President of Abilene Christian University at Dallas at the September 4 meeting of the Board of Trustees.

Dr. Warner delivered a speech at the University on May 13, 1979 entitled "Who are the Educated? A (soliloquy) with Socrates" which was published in "Vital Speeches of the Day", Vol XLV, No. 18, July 1, 1979.

Kermit Lidstrom, Ed.D. (C.H.E. '76) has been named President of Bismark Junior College, Bismark, N.D.

Antonio Suarez-Barrio, DPA (C.P.A.A. '78), has been appointed Director of Criminalistics Research for the American Educational Complex, whose worldwide installations are headquartered at the AEC Campus in Killeen, Tex.

Dr. Barrio's current research in "Subliminal Influences to Detection of Deception and Hypnotic Influences to Polygraph" has been published in current issues of the American Association of Police Polygraphists Magazine and the American Polygraph Association Journal.

Dr. Barrio is currently engaged in developing applications of the Texas Telecomputer Grid to polygraphy.

REGION VI

H. Gene Little, Ed.D. (C.H.E. '79) has been named vice president-corporate staff development of World Airways, Inc., Oakland, Cal.

H. Gene Little

Dr. Little most recently served with the Federal Aviation Administration as a planning and aviation education specialist in Washington, D.C. and Chicago, Ill. His honors include the Paul Mantz Memorial Award in 1968 for outstanding contributions to aerospace education which was presented by the California Aerospace Education Association, and in 1978 the Aerospace Educator of the Year Award from the Illinois Aerospace Education Association.

Chapter Meetings

South Florida Chapter, Ed. Leaders Program. The new officers for the 1979/80 year are: **Amy Dansky**, President; **Gloria Reich**, Secretary; (from Dade County) **Marwin Kwint**, President-elect; **A. Quin Jones**, Treasurer (from Broward County). Members met at the home of Dr. and Mrs. Fischler on Sunday, October 14, 1979. Dr. Sroufe was the guest speaker. One of the subjects discussed was the possibility of hosting an alumni event for graduates of the program at Commencement. The need for such an event received the approval and support of the members.

Region II

Report from **William Foster**, DPA, Regional Coordinator.

The National Capital Area DPA Chapter held a meeting in September to which **Arthur S. Flemming**, Chairman of the Civil Rights Commission, and former Secretary of HEW, was invited as guest speaker.

Mr. Flemming is a lawyer by training. He has divided his time between academic and university administration on the one hand, and public administration on the other.

Mr. Flemming was active on the U.S. News and World Report staff as a young man, and developed the Public Administration program at American University in the early 1930's. He has been a member of the US Civil Service Commission and President of Ohio Wesleyan University.

A meeting was also held on November 15, 1979. Dr. Patrick Conklin, president-elect, ASPA, and faculty member, Federal Executive Institute, Charlottesville, Va., was the scheduled speaker. Dr. King V. Cheek, Jr., Executive Director of the New York Institute of Technology/Nova University Federation also addressed the group. Professor Roy Crawley from the Central Office attended.

UNIVERSITY SCHOOL NEWS

New Programs At The University School

by Marlene Turk

Learning Tutorial Program

In an effort to plan the best possible program for our student body, the Upper House staff has been evaluating pupil progress, test results, and learning styles of each individual student.

A learning tutorial program is now incorporated into the University School. The program contains three components: a remedial reading tutorial, a remedial math tutorial, and a resource tutorial.

The math tutorial provides assistance to those students who are lacking basic skills in the math areas.

The reading tutorial services those students who would benefit from specific instructions in reading.

The resource tutorial reinforces the main subject areas and assists the student in organizational and learning skills.

All the tutorials are scheduled as classes during the school day and offered on a nine week basis to coincide with each marking period. The development of this program demonstrates The University School's consistencies in meeting individual student needs and reaffirms our commitment to the total student body. Coordinator of the program is **Ken Dose**.

Accelerated English

This class is designed for 9th and 10th grade students who show a special aptitude in English. The general course objective is for each student to obtain an appreciation of "classical" literature and to understand the universality of themes present in these works. It aims to improve the ability of a student to select a class-related specific topic, research it, organize it, and present the material, either orally or written, in a logical and persuasive way. Each student will lead the group in discussion and critical analysis of these presentations.

Tests will be student formulated, given, and graded. Through total participation in the program, the skills of critical analysis are developed in an effort to improve the student's understanding of their own communication skills.

Students are encouraged in these oral presentations to entertain the other students, and considerable audio visual materials, costumes, etc. are employed. Written presentations are critiqued by the instructor and other students in exciting round-table discussion groups.

Accelerated Math

The accelerated math program is designed for 9th and 10th grade students who have above average ability in mathematic computation. We hope to cover what normally would be 2 years of mathematics in just one.

Areas of mathematics that will be covered will be Algebra, Geometry, and Pre-Calculus. This year's students have had previous exposure to Algebra, so a heavier concentration will be made on the other disciplines with some time being spent on special interest areas and SAT preparation.

Honor Society Helps The Needy

The Honor Society of the University School sponsored a drive to collect canned goods for the people of the Dominican Republic after the devastation caused by Hurricane David. More than 750 lbs. of food was collected, gratefully accepted by an embassy representative of the Dominican Republic, and distributed to needy families.

Hot Off The Presses

"Learning News," a new publication that's virtually guaranteed to rock the publishing world, is now in production. The editors, reporters, copy writers, circulation people — and, of course, the readers — are eight to twelve year old children in the University School. The managing editor is Dr. Len Tomasello who's already boasting that a Pulitzer is just around the corner. The first issue deals with horses; the second, presidents.

What makes the magazine especially significant is that it provides not just reading for enjoyment but also learning activities relevant to the central theme.

"Adventures" In Learning

Three Nova specialists in early child education participated in a Broward Child Care Conference sponsored by the Early Childhood Development Association, in honor of the International Year of the child. **Drs. Joan Gelormino**, Director of Lower House I and the Parent Education Center, **Johanna Peck**, and **Phyllis Friedman**, were among the panelists/resource persons at the Nov. 17 Conference held at Broward Community College's north campus.

The littlest students at Nova now have their own homey classrooms, one group in a private residence immediately adjacent to the University School, the other in the former Development Office residence. These "classrooms" are complete with their own "Adventure" playground.

The 2½-3 year old pre-schoolers' program provides each child with a special teacher to relate to — a teacher who guides him through various "Interest Centers" which are each

located in a separate room, reports **Dr. Joan Gelormino**, Director. The four "Centers" are: Play and Communicate, Play and Learn, Play and Imagine, and Play and Discover.

The 3-4 year olds have their own "Interest Centers" built around the same four themes. This class has a team of four teachers to guide the children through a wide variety of learning/playing activities.

The kindergarteners (5 and 6 year olds) are in the main building of the University School, with four teachers to direct their play-learn activities.

Lest we forget, there are also the littlest Nova students of them all — the children of the infant-toddler Parent Co-op Program coordinated by **Dr. Wendy Masi**, which began Nov. 12. Three different Parent Co-ops are offered monthly throughout the academic year. Classes meet in a private residence near the school. For further information, call Dr. Gelormino at 475-1666.

photo by John Meaders

Duane Hanson, celebrated super-realist sculptor who received an honorary Doctor of Humane Letters degree at Nova's commencement exercise this summer, shares a contemplative moment with — his latest creation. Which one is Hanson? Guess!

ISPL Plans Many Projects

by David Liberman

Nova's Institute for the Study of Public Law may become a reality in the very near future, with some projects commencing during the next few weeks. "Most projects won't get off the ground until July 1, 1980," says Dean Ovid Lewis, "but the Law School has taken a number of intermediate steps to secure the Institute's future." Professor Cheryl Eisen, Administrative Director of the Institute, is developing avenues for the acquisition of grants, a necessary ingredient to the success of the organization.

One project is already underway. Tentative funding for a "Handbook on Juvenile Justice" has been earmarked by members of the Circuit Judges Judicial Conference. The handbook, to be compiled under the direction of Assistant Dean John Burris, will feature materials delineating the activities of the juvenile justice system.

Another project currently being planned involves an investigation into the recent controversy at the Forensic Unit of the South Florida Mental Hospital in Broward County. Over the past months, allegations of sexual abuses and inadequate living conditions have been levied against the institution. As a representative of the Public Law Institute, Professor Steve Wisotsky recently joined a group of interested attorneys "to review the mistreatment of the criminally insane with a view toward taking appropriate action via legislative, administrative, or judicial reforms." Should the program continue as planned, students will also participate in the preparation of descriptive reports, statutory proposals, and administrative re-organization provisions.

In addition to these two projects, there will be others including legislative drafting, preparation of Brandeis briefs, special investigatory reports, and research studies. Professors at the Law Center will serve as project

directors in areas within their fields of expertise; authorities from outside the university will be consulted; and a yet-to-be-appointed student director will be responsible for marshalling student talent.

Chris Edwards, co-founder of the Public Interest Law Society (PLIS), reports that this student group will function as the "organizational arm for the ISPL." The Society was partially responsible for the success of the Public Interest Law Seminar which Nova sponsored in October. Edwards recently applied for a \$1000 grant from the Law Student Division of the ABA to initiate a legislative drafting program under which concerned public interest organizations would submit proposals for federal and state legislation, and a staff, comprised of students and faculty, would then research and draft the legislative suggestions. Working in cooperation with the respective public interest organizations, the Society would complete its services by introducing the finished project to the appropriate governmental body.

"Street-Law Seminars," designed to educate the general public on legal issues such as landlord-tenant rights, consumer complaints, and small court procedures, are also on the drawing boards for ISPL.

The establishment of Nova's Institute for the Study of Public Law comes at a time when the ABA is stressing public service among its members. Public interest law was an important part of former ABA president Chesterfield Smith's program, and president-elect William Reese Smith has declared it this year's annual theme. The topic of Smith's speech at last month's first Public Law Seminar held at Nova sums up the attitude at the Nova Law Center. "The old lawyer said: 'I look out for my paying clients.' The young lawyer responded: 'But good lawyers must also do some free public service.'"

Nova Law Center Receives Grant

The Nova University Center for the Study of Law has received a \$1,000 grant from the Lawyer's Title Guaranty Fund and the George B. Carter Foundation, both of Orlando.

The Fund, Florida's bar related title insurer which operates through its 5,000 lawyer

members, and the Carter Foundation, named for the Fund's founder, make the grant each scholastic year. The money is used to assist in faculty-student research and related areas in the real property field.

Three graduates of Nova Law School have recently been named Fund members. They are: David M. Sostchin of the firm of Cardet, Sostchin and Granda, P.A.; Laurence D. Gore, who is active in legal practice in Fort Lauderdale; and David C. Miller, of the firm of Graham, Hodge, Larson, and Hume, P.A.

Nova Graduates 16 In Caracas

Sixteen people, all of them prominent leaders in Venezuelan industry, graduated with M.S. degrees in Personnel Management from Nova University at a commencement in Caracas, Venezuela a few weeks ago.

This was the third Nova program in Venezuela to have been co-sponsored by governmental and/or private agencies. The first, which ran from 1972 to 1974, was offered through the Institute of Pedagogy of the University, and awarded degrees in Education. The second, which offered degrees in Education and Personnel Management, was co-sponsored by the Polytechnical Institute of the University from 1974 to 1976. The latest program was co-sponsored by three groups: the National Association of Industrial Relations of Venezuela, the Ministry of the Science of Human Resources Development of Venezuela, and the Institute of Pedagogy of the University. Dr. Willard Leeds, Dr. Robert Jones, and later, Drs. Glenn and Marta Arango Nimnicht were instrumental in organizing the programs.

Among the graduates at the Caracas commencement were Bernardo Herrera, head of Human Resource Development of Maraven, S.A. (one of the holding companies for the Venezuelan oil industry); Juan Torres, director of the Experimental Education Institute of the University; and Jose Vivas, director for formulation of the extension division of the University of Simon Bolivar.

Dr. Abraham Fischler, in delivering the commencement address, expressed his pleasure and gratification at the results of the program which Nova helped develop in Venezuela. "This type of relationship — a relationship in which a university provides the expertise so that others can acquire technical knowledge, and then steps away — is important because it builds ties based on cooperation rather than on dependence," he said. "And these cooperative ties could have a profound effect on our future in this hemisphere."

Need Something? Call The I.R.S.

Question: how can a participant in Nova's off-campus Ed.D. programs gain access to the research data he/she needs to do a practicum or major applied research project?

Answer: by dropping a line of Rick Pratt, Nova's information retrieval specialist, who has access to over 30 million documents at the touch of a computer terminal.

Nova's Information Retrieval Service (IRS) comprises both the Lockheed Information System and the New York Times Information Bank. The Lockheed, in turn, includes ERIC (Educational Resources Information Center, with over 170,000 documents), the National Technical Information Service (NTIS, with over 460,000 abstracts of government research from over 240 agencies), the Psychological Abstracts, the Social Sciences Citation Index, and a large selection of Nova's own practicums. Most of these are available as abstracts, and a good many can be microfiched and sent directly to participants in the National Ed.D. Program for Ed. Leaders, the Ed.D. Program in Early Childhood Education, and the masters program for Child Care Administrators.

New Early Childhood Ed.D. Cluster Formed

The Ed.D. Program in Early Childhood Education has begun another cluster in South Florida. Cluster IV met for the first time on Dec. 8. The coordinator is Marvin Silverman, a recent Program graduate.

A Program social was held that evening. Participants and staff, along with their guests, enjoyed a light supper, good conversation, and an informal discussion with Roger Newgabauer, editor of "Child Care Information Exchange" newsletters. Roger's topic was "Child Care in the 1980's."

Cluster III participants are looking forward to February 9, the date of the last cluster meeting for the group. Many of them will have completed all of their requirements by August and will be graduating with the Ed.D. in Early Childhood Education.

Lewis Welcomed

A reception was held last month in the auditorium of the Leo Goodwin Sr. Law Center to welcome Dean Ovid Lewis into the legal/educational community. The reception was sponsored by the Broward County Bar Association, the judges of the 17th judicial circuit (Broward County), and the Board of Governors.

More than 250 distinguished guests joined in the welcoming celebration. Among the guests were several judges of the 4th district court of appeals and the county court, and leaders of the bench and bar. The ABA inspection team was also at the reception, as were members of Nova's faculty and administrative staff.

Enjoying the reception and one another's company are (left to right) Deborah Fromang, a Nova Law Center student; Federal Judge Jose Gonzalez; and Dean Ovid Lewis.

Goldberg To Teach At Nova Law School

Former United States Supreme Court Justice Arthur Goldberg will be a visiting professor at Nova Law School during the Fall academic semester of 1980-81, Dean Ovid Lewis has announced. Justice Goldberg will teach an advanced seminar on Constitutional Law.

He will require two second-year law students to aid him in his research on cases before the Court. All those interested in applying for these positions must submit a resume and a sample of their legal writing style to the Dean's office.

Law Students Win Honors

MOOT COURT REGIONAL COMPETITION

Nova Law School students came within one-quarter of a point of winning the "briefs" segment of the Southern Regional Division of the 13th annual Moot Court competition — a narrow defeat they consider a victory given the fact that Nova is the youngest of the five ABA (American Bar Association) approved law schools in Florida.

The competition, sponsored by the Young Lawyer's section of the Georgia Bar Association, took place last month at the Georgia Supreme Court and the Georgia state capitol. Arguments centered on whether a jury trial was constitutionally required in a complex patent-infringement case. Briefs were "filed" in Darlington, S.C., and then distributed to eight judges for grading. Emory University Law School emerged the narrow winner, beating Nova by only one-quarter of one point — a defeat which Nova's Moot Court Society considers a moral victory for the school, and for the Society program which is chaired by Prof. Steven Wisotsky.

CRIMINAL JUSTICE COMMITTEE

Shawn Briese, a third-year student at Nova Law School, was recently appointed as Law Student Division Member to the American Bar Association Prosecution Function Committee for the 1979-80 year. The committee is a criminal justice section substantive committee whose 15 members will hold meetings throughout the year to initiate and propose policy positions relating to the prosecution function.

DPA Winter Workshop

The DPA program is holding its Winter 1979 National Workshop this month at Nova University. This marks the initial workshop at which all three Intensive Sequences will be offered in parallel. About 60 doctoral candidates from 15 clusters are attending.

Twenty-four of the candidates are participating in Intensive Sequence A, "Program-Project Developer." Dr. Manuel J. Carvajal, Associate Professor of Economics and Public Administration, Nova University, will be the Preceptor.

Twenty-three persons are taking part in Intensive Sequence B, "Systems Changer." Dr. Albert A. Mavrinac, Professor of Government and Chairman, History and Government Department, Colby College; Mr. Richard L. Hartman, Executive Director, National Association of Regional Councils; and Mr. Alan L. Dean, Chairman of the Board of Trustees, National Academy of Public Administration, will be the Preceptors.

Fourteen people are participating in Intensive Sequence C, "Public Administration and the Public Administrator Viewed in Perspective." Dr. George A. Graham, Professor of Public Administration, Nova University, will be the Preceptor.

Twenty-three participants are presenting and defending their Analytical Project Proposals in small groups of their peers under faculty leadership.

photo by John Meaders

Appellate Judge Gavin K. Letts, one of the three judges who heard arguments on a mock case by two student members of Nova's Moot Court Society, congratulates Melanie May, who won the competition over opponent, Bradford Beilly, by a slight edge. Letts and the other two judges, James C. Downey and John R. Beranek, complimented both students on their efforts, noting that "those were the best arguments we've heard this week."

News of DPA

Dr. Charles J. Cunningham, Colonel, U.S. Air Force (D.C. I), has been transferred to Nellis Air Force Base in Nevada. He is Commander for Range Operations and Support of the Headquarters, USAF Tactical Fighter Weapons Center.

Dr. James F. Keane (Chicago I) has been elected to the Illinois House of Representatives, and named a member of the Revenue, Higher Education, and Appropriates Committees as well as Chairman of an Appropriations Subcommittee and a Revenue Subcommittee.

Dr. James H. Poisant (South Florida V) resigned from the faculty of the University of Miami to accept appointment as Director of Educational Systems for The Wackenhut Corporation. Wackenhut, with more than 20,000 employees, is one of the world's largest private international security and investigative organizations. Poisant will be responsible for determining the Corporation's training objectives, conducting its in-house training seminars, and administering industrial training programs for client organizations.

Dr. Robert C. Preziosi (South Florida III) has been appointed a Consulting Associate of Organizational Renewal, Inc., of The Gordon Lippitt Consulting Group.

New DPA Clusters

In the DPA program, the Tampa Bay I cluster was activated on October 12-13 when it met for Unit 1.1; Ohio Valley I began November 30-December 1, 1979; and seven other clusters — Chicago IV, Delaware Valley III, Huntsville IV, New England II, North Florida III, Northern Virginia III, and South Florida IX — are expected to be initiated during this fiscal year which ends June 30, 1980.

Three MPAS clusters are being organized in Gainesville and West Palm Beach, Florida, and Washington, D.C.

PEOPLE IN THE NEWS

Irving Rosenbaum, a DPA candidate in South Florida VIII, has been appointed Town Administrator of Davie, Florida. He had served as Assistant to the Mayor of Lauderhill, Florida, and teaches labor relations at Nova College.

John Syron, Captain of Detectives, Hillsborough County Sheriff's Office, has been appointed Cluster Director of the DPA Tampa Bay I cluster. Syron holds the Masters of Education (Administration and Supervision) from the University of Tampa. He is a lecturer in the Social Sciences Department at the University of Tampa.

Dr. William D. Smith, DPA Cluster Director, Chicago, is the author of an article entitled "The ABC's of Grievance Adjudication" which was published in the "Public Administration Times" of June 15, 1979.

Dr. Phyllis Brick represented the CPAA at the 1979 National Conference of the National Association of Schools of Public Affairs and Administration (NASPAA) in Los Angeles. Two hundred and fifteen deans or directors of public affairs/administration programs attended.

Professor Roy W. Crawley, DPA Program Director, attended the Annual Meeting of the National Academy of Public Administration on November 15-16. Professor Crawley has submitted his resignation effective the end of this calendar year. In a letter to President Fischler, Crawley stated, among other things, that "Nova, through its off-campus national doctoral programs designed for professional in-career, has had an impact in recent years on U.S. higher education matched by very few other academic institutions."

Dr. Marvin Weiss, adjunct professor in Nova Graduate Management Program, spoke on "Human Resource Accounting" at a meeting last month of the American Society for

Training and Development, Broward/Palm Beach Chapter.

Drs. Ross Moreton, Malcolm Knowles and Eugene DuBois attended the annual meeting of the Adult Education Association of the United States, which was held last month in Boston. Dr. Knowles delivered the keynote address on the topic, "Preparing to Cross the Bridge." The Center for Higher Education, with which all three men are associated, staffed a booth at the meeting. Dr. Moreton also staffed a booth at a meeting of the American Vocation Association which was held in Anaheim, CA, earlier this month.

Shawn L. Bries, a third year law student, has been appointed as law student division member to the American Bar Association prosecution function committee for the 1979-80 association year. The prosecution function committee is a criminal justice section substantive committee, which will initiate and propose policy positions relating to the prosecution function. Basic committee functions include following important federal legislation, analyzing pending bills, and submitting reports and policy recommendations for the criminal justice section's governing council. The committee's fifteen members, from various parts of the country, will be holding meetings throughout the association year.

William Markowitz, Adjunct Professor of Physics, read "Independent Polar Motions" at the International Astronomical Union meeting in Montreal, August 1979; reviewed M. M. Thomson's book on timekeeping in Canada, in "Sky and Telescope," August 1979; wrote "Dynamical Time" for McGraw Hill Encyclopedia of Science and Technology, September 1979; and wrote six articles on the calendar, size and shape of the Earth and its motions in space for Academic American Encyclopedia in 1978-79. He also

lectured at the Helwan, Egypt, Institute of Astronomy and Geophysics on dynamical problems of earth rotation in October 1979.

Dr. Martin Weiner spoke at the Lauderdale Oaks Retirement Club on the subject of "Investments." Margaret Shearon spoke at a luncheon meeting of the Margate B'Nai B'Rith Women's Club on the subject of "Stress Management."

Marvin Weiss, Ph.D., spoke at a meeting of the American Society for Training and Development, Broward/Palm Beach Chapter, on the subject "Human Resource Accounting." Dr. Weiss is dean of Graduate Business and Director of the Center for Business and Economics at NYIT. He was the originator of Nova's MBA/HRM program, and teaches Accounting for GMP.

Dr. Graham Baxter, GMP adjunct professor of Organization Behavior, Business Policy, and Energy Technology, has been appointed Director of the Energy Technology Management Center at the University of Pittsburgh, where he is a full time faculty member. Dr. Baxter, along with Dr. Weiner, is designing the new Energy Technology Management program which will be offered as a specialty as part of the MBA/HRM.

Dr. Allan R. Cohen, professor of management at the Whittier School of Business, University of New Hampshire, and a member of the N.H. Post Secondary Education Commission, recently visited with the participants of Nova's DBA-I cluster and their professor, Dr. Waino Soujanen (who is also a professor of Management at Georgia State University) to gather on-site information as part of a licensure process.

Drs. Rose Carlson and Michael Palmer appeared on WFTL, Nov. 29, from 7 to 9 p.m. Their subject was "How To Fall Out of Love."

Wayne Williams, Director of the Institute for Survival Technology, recently conducted a special one-day course in sea survival techniques for the Airline Pilots Association. An article on the course will be published in the February issue of ALPA Magazine.

Marvin Silverman presented his second year practicum (Ed.D./Early Childhood Education) to the Florida Personnel and Guidance Association's annual meeting in Daytona Beach Nov. 16. The practicum, "A Multimodal Approach to Parenting Skills Classes," emphasized combining behavior modification techniques with Adlerian and Rogerian approaches as a curriculum for teaching parents effective parenting skills.

An article by Diana Wasserman (Ed.D./Early Childhood) titled "Educating the Exceptional Child: Mainstreaming and Beyond" appeared in the Fall, 1979, issue of "Directive Teacher."

Cynthia Greb (Ed.D./Early Childhood) earned the 1979 Teacher of the year award at Amelia Earhart Elementary School in Dade County.

Cody Gear (Criminal Justice, Jacksonville Cluster) has just been appointed Chief of Police of Fernandina Beach, Fla.

Thomas Dettman (Criminal Justice), has been appointed Lieutenant of the Boynton Beach Police Dept.

Dr. John P.J. Dussich, adjunct professor of Criminal Justice, and executive director of (by coincidence) NOVA (The National Organization of Victim Assistance), has been elected secretary of the World Society of Victimology formed in Muenster, Germany in Sept. of this year. Dr. Dussich is an internationally recognized authority on victimology, and is currently a professor in the Dept. of Criminal Justice at the University of Southern Mississippi in Hattiesburg.

CJ IN THE NEWS

CJ Joins CPAA

Nova's Criminal Justice program has been made a part of the Center for Public Affairs and Administration. It is an off-campus program of 18 months duration, leading to the degree of Master of Science in Criminal Justice. It is delivered in the cluster format with monthly conferences on Friday afternoon and Saturday.

Designed primarily for working students, the Program can be adapted to the needs of pre-service students. Its objectives are to (1) provide students with the knowledge and skills needed to assume administrative roles in their employing agencies, and (2) prepare students for teaching careers in criminal justice.

The Program was initiated in 1975 and has approximately 300 graduates. Seven clusters, with about 90 students, are underway in Florida (Gainesville, on the Nova campus (two), and Tampa); Virginia Beach, Virginia; Washington, D.C.; and Wilmington, Delaware.

Dr. David W. Britt, who holds the Ph.D. in Sociology from the University of North Carolina at Chapel Hill and was on the faculties of Vanderbilt and Florida International Universities, is the Program Director.

IN MEMORIAM

The Graduate and Undergraduate Criminal Justice programs of Nova University wish to express its sorrow upon learning of the death of Mr. John Hofers, Chief, Coconut Creek Police Department. Chief Hofers was one of our finest students who distinguished himself both in academia and as a professional in the field of criminal justice.

Shaking The Money Tree

What started as a noble experiment has become, in only a few short months, a sequence of two of the most exciting, and most popular, courses in the graduate Criminal Justice program, and in the Center for Public Affairs and Communication, with which CJ is now affiliated.

Small wonder. Any course that teaches people how to get money, and virtually guarantees their success at it, has got to be a winner.

The courses, taught by Dr. Jim Chinn and various members of the department, are "Program, Policy and Personnel Evaluation," and "Grant Writing." The first one teaches people, from the private as well as the public sector, how to determine where they are, and decide where they want to be. The second shows them how to get their from here, with the help of grants — government, private, foundation, or whatever.

"One of the requirements of the course in Grant Writing is for the proposal to have the approval of the agency the student works

Nova In Panama — A Bridge To The Future

Nova has just been granted permission by the Panamanian government to continue and expand its programs in Panama.

Before the new Panama Canal treaties went into effect on Oct. 1, Nova had operated Criminal Justice programs at the bachelor's and master's levels, and a Master of Business Administration/Human Resource Management program in the former Canal Zone. Many people working in Panama — those associated with the operation of the Canal and others involved in commercial enterprises — availed themselves of the educational opportunities which Nova's external degree programs were able to provide. These programs, widely recognized as the most beneficial and the most readily available source of educational opportunity for working professionals in that area, received high praise from Panamanian and United States authorities both for their stabilizing influence in the area during a time of potential turmoil, and for the educational benefits they offered to citizens of both countries. It was this recognition of a job well done, and the government's confidence in Nova's ability to provide further assistance to Panama during the critical period of transition from U.S. management to full Panamanian control, that led to the granting of permission for Nova to continue its programs in Panama.

The Criminal Justice and the MBA/HRM programs will be continued. In addition, Nova is developing an intensive English program which will be made available to Spanish-speaking people in the private sector as well as to those employed by the Panama Canal Authority, (the Panamanian arm of the transition

team). Nova is also designing an intensive Spanish program for the English speaking employees of the Panama Canal Commission (the U.S. arm of the transition team). Plans call for the presentation of a series of managerial and administrative seminars for high level employees in both the public and the private sectors; additional programs in educational/technical fields; and a doctoral program in Public Administration for top administrators.

Nova feels that its efforts in these directions

will serve as a bridge between people of different cultures at a time of enormous changes in the operation of the Panama Canal, just as Panama itself is a bridge between the Americas, and the Canal a bridge between the oceans. A highly motivated and educated workforce will be the foundation of the bridge by which Panama will enter the 21st century, fully capable of carrying out her increased responsibility for world commerce.

A New Beginning

Editor's note: following are portions of the commencement address delivered by Irving Goldaber, Ph.D., on the occasion of the graduation of the first Criminal Justice clusters in what was then the Panama Canal Zone.

"... I speak to you, the candidates, on the day before the last day of the Canal Zone's existence, as you are assembled here at this important crossing in each of your personal journeys. You are participating here today — at this graduation ceremony of the Nova University Canal Zone Cluster — in a crossing from one stage of life to another. You are passing through a linkage...

"For many of you who are being grad-

uated today, the passage ahead is into uncertain waters. Will you continue in your present job? Do you look forward to an association with a new employer? Will you remain in Panama once the Canal Zone no longer exists? Will your children live near you after they leave for localities of their own selection? ... In some respects, you are in a condition of crisis...

"Your knowledge obligates you to work for the well-being of people — to utilize your labor to build new canals for others to pass through to new opportunities ... With your flag flying boldly, you have come through your own Panama Canal. For everyone, I salute you."

Part of the first graduating class in Criminal Justice, shown standing under the "Bridge of the Americas" which spans the Panama Canal. Among the 54

graduates were high ranking Panamanian and U.S. officials from the public and the private sectors.

2nd Annual NOVA BEHAVIORAL CONFERENCE on Aging

"Enhancing The Quality Of Life In The Later Years"

January 23-26, 1980

Galt Ocean Mile Hotel, Fort Lauderdale, Florida

Conference Chairperson Dr. John M. Flynn listens as Dr. B.F. Skinner describes methods of managing problems of old age during last year's conference.

Sparked by B.F. Skinner's presentation ("Intellectual Self-Management in Old Age") during last year's conference, this year's theme will focus on Enhancing the Quality of Life in the Later Years. The 1980 conference planning committee has called upon nationally recognized Gerontologists, Psychologists, Architects, Social Scientists, Physicians, Educators, and Policy Makers to share current research and opinions and to discuss implications for community program development, models for service delivery, and training of Mental Health Practitioners. The major issues of Health, Environment and Cognition, as they relate to the elderly, will be explored by Keynote presentations and supplemented by Symposia discussions allowing for maximum audience participation and interaction.

A Local Community Program exhibit, Poster Session, Film program, Funding Luncheon, Banquet, Social Hours, plus unlimited land and sea recreational activities will contribute to a meaningful and enjoyable conference.

PROGRAM SPEAKERS AND TOPICS

January 24: ENVIRONMENT

- Sandra Howell, Ph.D. (MIT) Enhancing the Physical and Social Environment
- Joyce Parr, Ph.D. (Foundation for Aging Research, Clearwater) and John McRae AIA (University of Florida) Optionality in Living Environments
- Margaret Baltes, Ph.D. (Pennsylvania State University) Dependence and Independence in the Nursing Home Residence as a Function of the Social Environment
- Victor Regnier AIA (Univ. of Alabama) Patterns of Neighborhood Use and Prescription

January 25: HEALTH

- Jim Fries, M.D. (Stanford School of Medicine) The Health of Older Americans (1975-2000)
- Jordan Tobin, M.D. (Gerontology Research Center, Baltimore City Hospital) Baltimore Longitudinal Study: Aspects of Environment and Aging
- Edward Katkin, Ph.D. (S.U.N.Y. Buffalo) Personality Variables in Heart Attacks
- Alan Roberts, Ph.D. (Univ. of Minnesota) Behavioral Management of Chronic Pain

January 26: COGNITION

- Donald Michenbaum, Ph.D. (Univ. of Waterloo) Self Reinforcement
- Ilene Siegler, Ph.D. (Duke University) and Margaret Gatz, Ph.D. (USC, Los Angeles) Coping Skills
- Paul Baltes, Ph.D. (Penn. State Univ.) Elasticity of Intellectual Performance in Old Age
- Beth Loftas, Ph.D. (Univ. of Washington) Memory and Aging

Guess Who?

photo by John Meaders

Who was that masked telephone switchboard operator we saw you with last Oct. 31? We've been sworn to silence, but we'll give you a hint. Her name has 17 letters, two vowels, and ends in ZX.

Learn German In Germany

The German Academic Exchange Service, Deutscher Akademischer Austauschdienst (DAAD), is offering a special scholarship program for German Language courses at one of the Goethe Institutes in the Federal Republic of Germany. The program consists of an eight-week session (24 periods per week), as well as movies, guest lectures, sports and cultural events, and social activities.

Additional courses in agriculture, German studies and research are also available. For further information, write Dr. Arnold Ebel, Director of DAAD New York Office, 535 Fifth Ave., Suite 1107, New York, NY 10017, or call 212-599-0464.
